Permeable Paver Product Technical Data sheet

The Block Shop NZ Ltd concrete paver range is produced with locally sourced NZ cement and additives.

Permeable Pavers are produced in natural and charcoal colours, for use in commercial and residential areas. These products are laid on specially prepared grounds.

Relevant Building Code Clauses : The BlockShop manufactures all paving products following NZS3116 with independent testing to AS/NZ4456 from an IANZ-accredited lab. The Blockshop pavers demonstrate compliance with :

B1-Structure. Performance clauses

Technical Data Age of test : 28 Days

Colour	Grey			
Paver Weight	Std paver when Dry	Typically less than	3.372 Kg	80 x 100 x 200
Compressive Strength	AS/NZS 4456.4:2003	(tested by Stevensons (NZ)	30mpa	Conforms to NZS 4456:2003

Health and Safety

Avoid breathing dust when cutting or grinding as dust contains Silica and cement particles.

Wear a paper dust mask during such operations.

Dave Shortt

Director
